CompleteCare Mini-Split Kit

Over time, the inside of Mini-Split units become plugged with dirt, grime and a coating of mildew. The coil, blower wheel, condensate pan, and plastic housing need to be cleaned as well as disinfected periodically. Drain pan treatment is also recommended to guard against overflows due to plugged lines. The **CompleteCare Mini-Split Kit** is your solution to all these problems.

The kit contains one 18 ounce can of Evap-Fresh™ No Rinse Evaporator Coil Cleaner and Disinfectant, and one PurCool® Green Mini Strip. Evap-Fresh will disinfect, deodorize, and control mold and mildew in the evaporator coil. The PurCool Green Mini Strip can be cut to size to treat the drain pan, preventing slime buildup in drain lines and overflows.
